EDUCATION

Bachelor of Science, Computer Science

September 2022 – May 2027

University of Calgary, Alberta

- **Awards/Accomplishment:** Science COOP Program and Calgary Flames Foundation Outstanding Youth Scholarship
- **Relevant courses:** Software Engineering, Data Structures and Algorithms, Database Management Systems, Human Computer Interactions, Computer Networks, and Explorations in Machine Learning

EXPERIENCE

Software Development Intern

September 2025 – April 2026

MASIV – Calgary Alberta

- Developed and maintained production web applications using **React, Next.js, Node.js, and general web technologies** (HTML, JavaScript, Python, Java, SQL), delivering scalable, high-performance user experiences.
- Built responsive, mobile-first interfaces with **Tailwind CSS** and integrated **third-party SDKs, GraphQL, and REST APIs** to enhance functionality and data management.
- Collaborated using **Git** and **Azure DevOps CI/CD pipelines**; gained hands-on experience with **AWS services** including **S3, Lambda, IAM, and Amplify** for scalable backend solutions.
- Worked with backend services using **GraphQL and REST APIs**, ensuring efficient data fetching and state management.

Girls Coding Instructor

May 2023 – August 2025

Minds in Motion - University of Calgary

- Taught programming fundamentals in Scratch, Python, JavaScript, and Unity (C#) to 150+ students through hands-on workshops.
- Led introductory Unity game development lessons, guiding students through building and exporting interactive projects, including VR-compatible builds, with 90% reporting increased confidence

PROJECTS

Blitz Construction & Delivery | React Native, Expo, Firebase, WebSockets, Stripe

September 2025 – Present

- Advanced development of a beta-stage platform by building mobile-first features supporting time-sensitive construction supply deliveries.
- Enhanced real-time job tracking with WebSockets, enabling sub-second updates for improved operational visibility.
- Integrated Firebase to maintain reliable, cross-user data synchronization across the platform.
- Designed and implemented Stripe-backed APIs to streamline payment workflows.
- Applied web best practices including **SEO optimization, accessibility (WCAG), Core Web Vitals performance improvements, and security considerations**.

MASIVINTRANET | React, Node.js, n8n, Pinecone, Ollama

September 2025 – December 2025

- Contributed to building Hiemdall, a large language model (LLM) trained on company-specific data to provide accurate, context-aware insights for internal workflows.
- Designed and implemented n8n workflows and Pinecone vector database pipelines for automating data retrieval and supporting generative AI queries.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++, C#, SQL, PostgreSQL, Object-Oriented Design, Data Structures & Algorithms
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Hapi.js, PyMOO, Three.js, WebGL, RESTful APIs, Stripe API
Developer Tools: Git, Visual Studio Code, Xcode, Jira, Postman, Docker, MongoDB, Supabase, Firebase, AWS, Microsoft Azure, Cursor, Microsoft Copilot, JUnit, Cucumber, Power BI, MacOS, Linux, Windows
